

How to Create Slide Show in Parish Hall

This is a quick guide how to play a slide show for a funeral or other event.

First turn on the full sound and video system in the parish hall.

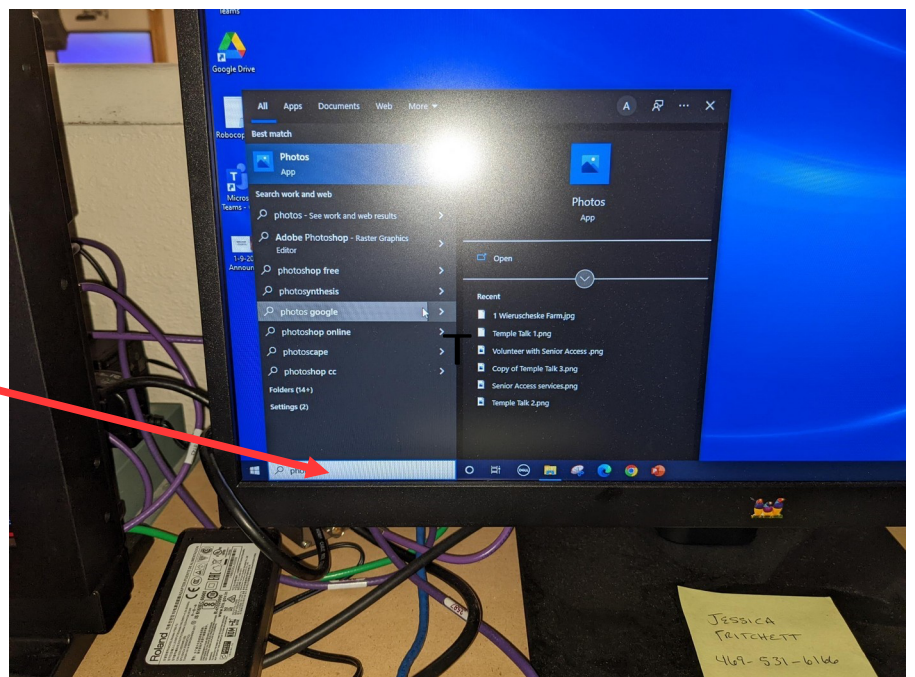

Turn on the three projectors using the remotes.

Turn on the Sony Monitor using the Far right button.

Turn on the video Switch on the back Side of the enclosure

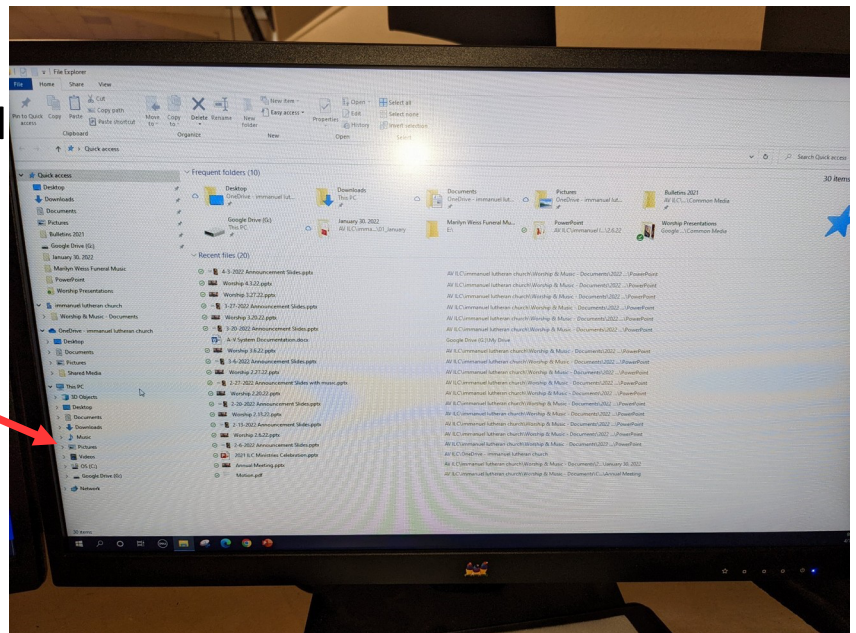

Search for the “Photos” App on the PC. Open The app.

How to Create Slide Show in Parish Hall

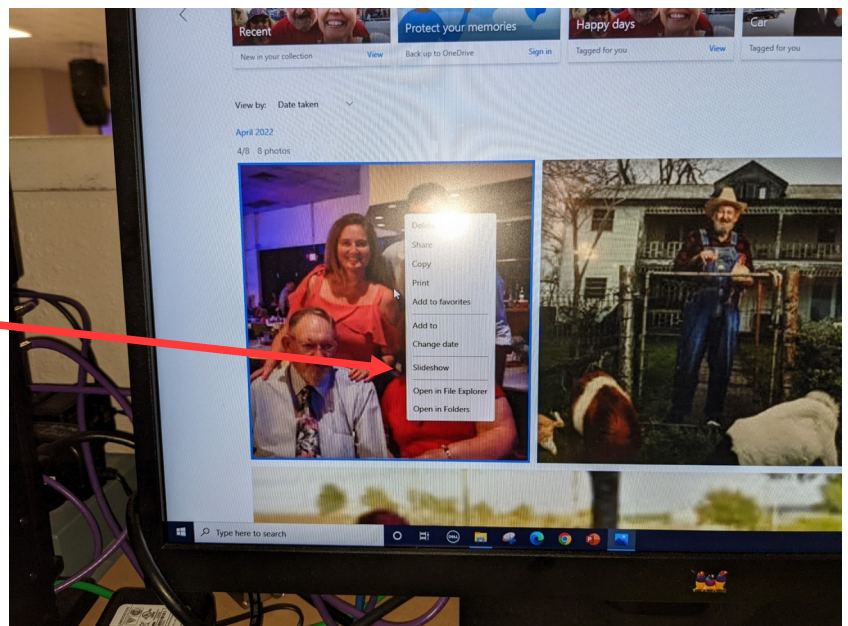

If you have a USB Drive with the photos, install it in the PC USB port and look for the drive using File Explorer. If you have photos from another source. Find a way to open the photo file using the Photo App.

The USB Drive should Show up in this area Of File Explorer

Open the photo folder Using the Photos App

When open, “Right Click” and select the “Slideshow” option. The slide show should Start on the PC Monitor.

How to Create Slide Show in Parish Hall

When the slide show opens, it will be on the PC monitor. In order for the slide show to be displayed on the projectors, You must drag the slideshow window onto the Sony monitor as shown below. At this time, the slideshow should be displaying on the projectors. This slideshow only shows for maybe 20 minutes. You will need to re-start this show 3-4 times during a 1-2 hour period.
